

Any trip leased apportionable vehicle operated into or through member jurisdictions must bear IRP registration credentials and be operated only in the jurisdictions to which IRP fees have been paid or a trip permit will be required.

### **RENTAL VEHICLES**

The IRP specifically provides for the registration of rental company fleets. Registration of such fleets varies depending upon the type of fleet involved. The base jurisdiction definition in Section 210 of Article II applies under this Article and the conditions therein specified must be met by the rental company as registrant of the fleet; except when the rental agreement is for more than sixty (60) days, the rental customer must have an established place of business and his fleet must accrue miles in the jurisdiction selected as the base jurisdiction for the license year.

### **RENTAL TRAILERS AND SEMI-TRAILERS**

Trailers and semi-trailers, over 6,000 pounds gross vehicle weight and used solely in pool fleets shall be licensed by dividing the gross revenue received in the preceding year for the use of such rental vehicles arising from rental transactions occurring in the jurisdiction by the total gross revenue received in the preceding year for the use of such rental vehicles arising from rental transactions in all jurisdictions. The resulting percentage shall be applied to the number of units in such fleet, and that number of vehicles fully registered and plated in the jurisdiction. These vehicles should be registered in the county that they are based.

### **ONE-WAY VEHICLES**

Owners of trucks with a gross vehicle weight less than 26,000 pounds, operated as part of an identifiable one-way fleet, will allocate vehicles to the respective jurisdictions based on the percentage of miles traveled in each jurisdiction. A simplified example: A rental fleet of 100 vehicles only operates in Alabama and Florida. The total fleet distance equals 100,000 miles. If total distance operated in Alabama equals 25,000 miles and 75,000 miles for Florida, then 25% of the fleet vehicles (25) should be registered in Alabama and 75% of the vehicles (75) should be registered in Florida.

All vehicles of qualified one-way fleets will be allowed to perform both intrastate and interstate movements in all jurisdictions. At the option of the registrant, one-way vehicles may also be apportioned.

### **UTILITY TRAILERS**

Owners engaged in the business of renting utility trailers weighing 6,000 pounds gross and under, for use in a jurisdiction, shall register a number of trailers equal to the average number of such trailers rented in or through the jurisdiction during the preceding year.

Since the Alabama MCS office does not currently register utility trailers, the required number of trailers should be registered in the county(ies) where the rental company is based.

### **HOUSEHOLD GOODS CARRIERS**

Household Goods Carriers, using equipment leased from service representatives, may choose to either base the equipment in the base jurisdiction of the service representative or in the base jurisdiction of the carrier.

If the base jurisdiction of the service representative is chosen, the equipment shall be registered in the service representative's name and the lessee. Intra-jurisdictional distance records are maintained by the lessor-service representative and inter-jurisdictional distance records are maintained by the lessee-carrier and furnished to the lessor-service representative. The apportionment of fees shall be according to the combined distance records of the service representative and those of the Household Goods Carrier. Such records must be kept or made available in the service representative's base jurisdiction.
