

If the base jurisdiction of the Household Goods Carrier is selected, the equipment shall be registered by the Household Goods Carrier and the service representative shall be designated as the lessor. The apportioning of fees will be based exclusively on the service representative's distance records. This includes any intrastate miles operated by those vehicles. The records must be kept or made available in the base jurisdiction of the Household Goods Carrier. Service representatives properly registered under this election shall be fully registered for operations under their own authority as well as under the authority of the carrier.

BUSES

Buses transporting passengers for hire interstate should be apportionally registered unless they are used exclusively for charter operations. However, buses used exclusively for charter are often registered under the IRP in order to satisfy license requirements of some jurisdictions.

Registrants of buses have two options available to meet IRP distance reporting requirements. The Plan states that, at the option of the registrant, total miles may be the sum of all actual in-jurisdiction miles or a sum equal to the scheduled route miles per jurisdiction from the farthest point of origination to the farthest point of destination of the scheduled pool.
